On June 22, 2012, DOE received an application from GSEMNA for authority to transmit electric energy from the United States to Mexico for five years as a power marketer using existing international transmission facilities. GSEMNA does not own any electric transmission facilities nor does it hold a franchised service area.

The electric energy that GSEMNA proposes to export to Mexico would be surplus energy purchased from electric utilities, Federal power marketing agencies, and other entities within the United States. The existing international transmission facilities to be utilized by GSEMNA have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

**PROCEDURAL MATTERS:** Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of

Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments on the GSEMNA application to export electric energy to Mexico should be clearly marked with OE Docket No. 386. An additional copy is to be filed directly with Cesar Seymour, Director-Special Projects, IPR-GDF SUEZ Energy Marketing North America, Inc., 1990 Oak Post Blvd, Suite 1900, Houston, TX 77056 and Catherine P. McCarthy, Bracewell & Giuliani LLP, 2000 K Street, N.W., Suite 500, Washington, DC 20006.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR Part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at <http://energy.gov/node/11845> or by emailing Angela Troy at [Angela.Troy@hq.doe.gov](mailto:Angela.Troy@hq.doe.gov).

Issued in Washington, D.C., on June 28, 2012.
